Obsessive Ideasmith

It's normal for me to spend hours zoomed in 5000% when I'm working. For me it's all about the little details; they make the big idea work. A good idea turns into a great one when I take the time to perfect it; 10 tries or 100 tries, it's worth it. At the top of the page, while it's not perfect, is a logo that I made from my handwriting. Over 50 variations of this thing and it will never BE perfect. But to me, I love ideas. and nothing is worse than seeing a good one die, and I do anything I can to keep that from happening.
